

# Information Space: Issues and Context

Breakout Group 3

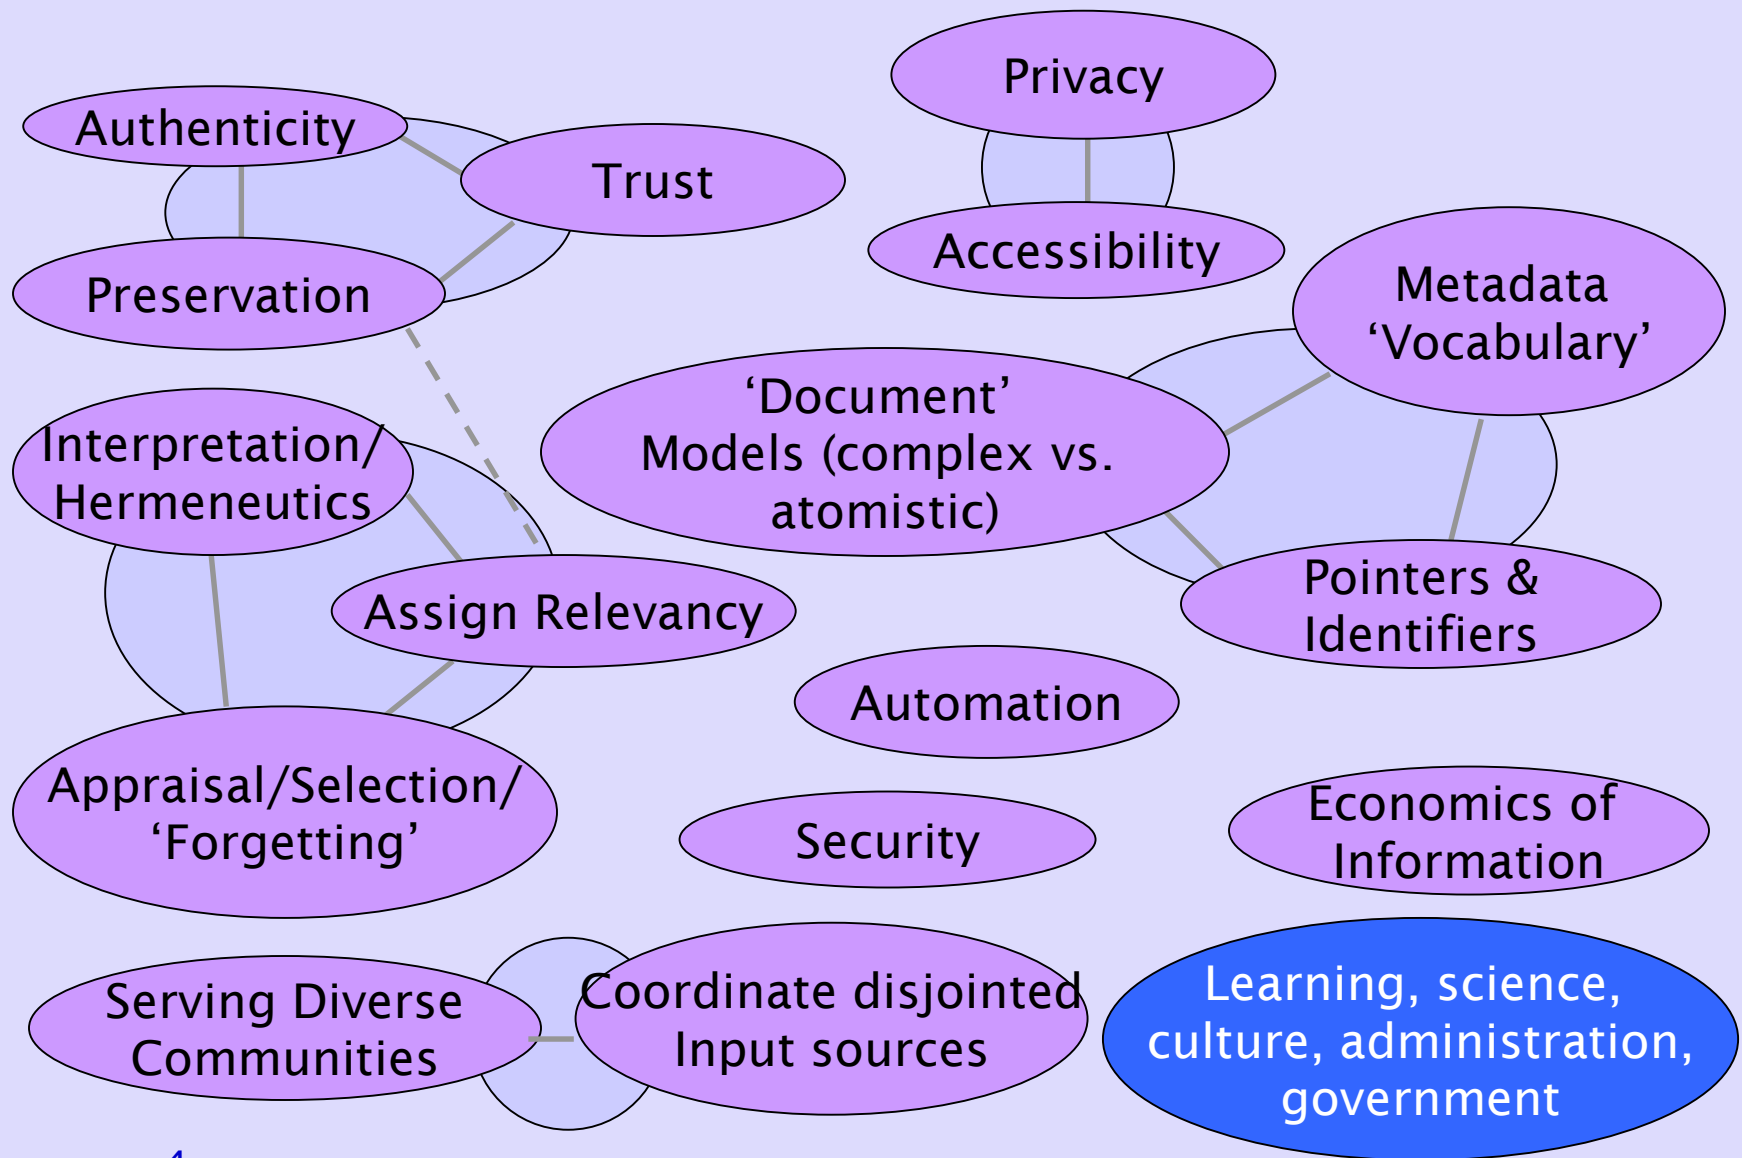

# Context: where Information Environment Framework (formerly DL) fits in.

# Information Environment Framework: internal layering and relation to domain specific semantics

# Critical Issues

# Critical issues: clustered

## Rights & Duties

Preservation  
Authenticity  
Trust

## Enrichment

Interpretation  
Appraisal/Selection  
Relevance Assignment  
Annotation

## Processes

Automation

## Effort/benefit ratio

Economics of  
Information

Unifying Paradigms (= 'Theory')

## Information Objects/ Architectures

Document models  
Metadata/vocabularies  
Pointers & Identifiers

## Heterogeneity & Context

Coordination of Diverse  
Information Sources  
Serving Diverse ISs

## Usage

Accessibility  
Privacy  
Collaboratories

## Context again: where work needs to be done
